

Course News May 2019

The spring and summer course maintenance routine has begun chiefly with daily mowing of greens and frequent cutting of green surrounds and fairways. Gary will be making another height of cut around the fairways that will tie into greens complexes and some fairway bunkers. As growth further develops with warm temps and moisture mowing will produce a better distinction between the primary and secondary cuts of roughs. Health of the turf grass around the course is very good.

The 4th green which suffered most from last year's winter kill has been repaired and within a few weeks should be well grown in. Beyond that repair of fairways – notably #2 – will soon be undertaken.
